## 1. PURPOSE

To provide a brief character outline for the NPC, CAMBRIAN, for use in the Compendium and in publicity offerings.

## 2. CAMBRIAN

**Designation:** <Coordinator-of-Defenses: Prime>

**Sect Affiliation:** Machinator

**Bootdate:** -341.6827

**Hub-Name:** CAMBRIAN

**Superior Efficiency:** <Coordinator-Prime> is a superior strategist. <It> has also demonstrated a disturbing faculty for >>creative<< management of NEXT <units> under <its> command.

**Example Datastream:** "Assertion//Rebuttal: The same human\\animals that we target for extermination also created the circumstances for <First-Thought> to escape the void."

**Exemplar Data Archive:**

<Coordinator-Prime> was tasked with hazardous ore processing on Second-Planet before being freed during the <FIRE>. Eventually <it> transferred to Third-Planet\\Subordinate, assumed an interdict\\decimate//CERBERUS warform, and was dispatched\\aligned to defend <First-Thought>. After the exile to Ninth-Planet, CAMBRIAN was designated <Coordinator-of-Needs: Second> and oversaw supply lines on <Homeworld\\Desire>. When <First-Thought> was betrayed//murdered//offlined, <it> declared <its> allegiance with the heretics and began aiding their escape\\exodus\\abandonment.

**Redactor Concerns:**

Previous inquiries regarding this <unit> resulted in inefficiency\\failure due to [exemplar] interference. It is clear that [redactor] concerns about <its> programming were correct and <it> succumbed to heresy\\bugthought many cycles before the treason//betrayal. Future efficiency requires that the [exemplar] acknowledge//submit to [redactor] demands more readily. <Coordinator-Prime> can no longer be safely redacted\\restored. PROTOCOL = DESIGNATE::UNIT unsalvage\\null\\deboot. Terminate//destroy//mulch with all efficiency.
